

This was an extraordinary project in many respects, a neighbourhood Centre designed as a self build timber frame structure using the principles of Walter Segal. It was the largest in Europe in 1999 and has had many interested visitors.

Located in the heart of S Anne's, Nottingham it has a curved grass roof, environmentally sourced timber and organic finishes throughout.

The project won a national award for good practice in urban regeneration and The Nottingham Lords Mayor Award. It was opened by David Bellamy.
